3 (33-Trefethen & Bau) Vector and matrix p-norms are related by various inequalities, often involving the dimensions m or n For each of the following, verify the inequality and give an example of a nonzero vector or matrix (for general m,n) for which equality is achieved In this problem x is a m-vector and A is a m× n matrix (a) $\|Ax\|_p \leq \|A\|_p \|x\|_p$
